CIRCULAR RANGE TO SUIT DRYLINING CEILING SYSTEMS

CIRCULAR CEILING ACCESS PANELS

NON FIRE RATED

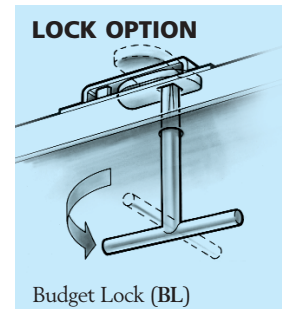

Where circular features such as light fittings, speakers and air diffusers are prominent within a ceiling, a circular access panel would be more in keeping aesthetically.

ACE have developed two types of circular access panels with either a twist out or hinged door mechanism that can be used in plasterboard ceilings. They can be specified with a combination of door finishes (flush metal or recessed to accept plasterboard) together with either a flush flange or a beaded edge frame.

The flush door can be specified with either a polyester powder coated finish or an undercoat to accept on site decoration.

If specifying the recessed door for plasterboard insert it is recommended that you do not exceed the 600mm diameter door.

PANEL TYPE	SIZE (mm)		
	300	450	600
TWIST OUT WITH FLUSH DOOR	✓	✓	✓
TWIST OUT WITH PLASTERBOARD INSERT	✓	✓	✓
HINGED WITH FLUSH DOOR	✓	✓	✓
HINGED WITH PLASTERBOARD INSERT	✓	✓	✓

NB: All above models are available with either a flush frame or beaded edge frame.

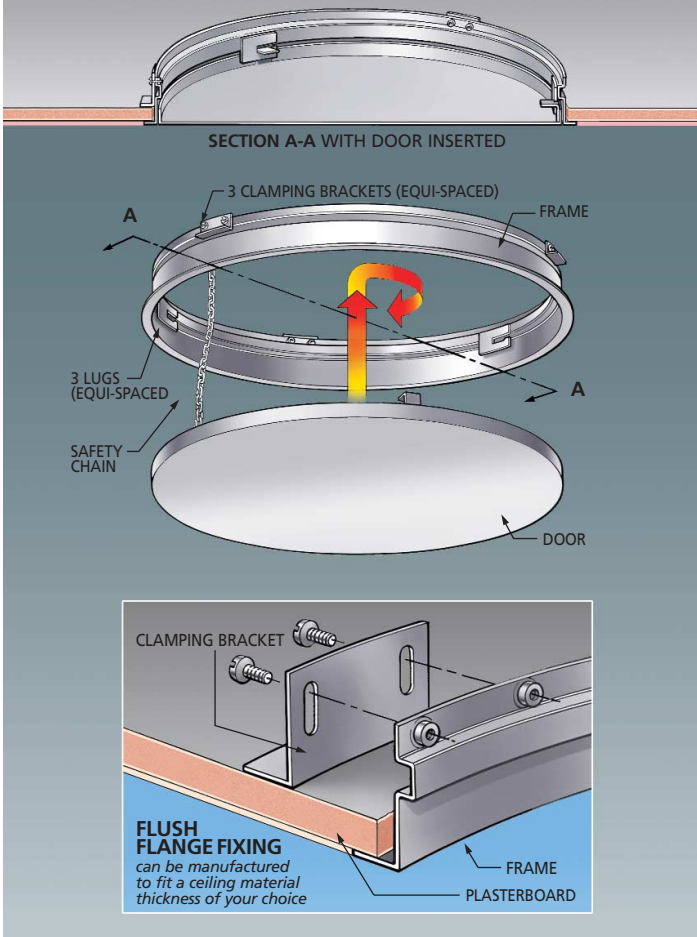

Special sizes can be manufactured upon request. Please contact our Technical Department.
