ACCESS PANELS

TO SUIT TILED WALL APPLICATIONS

TILED WALL ACCESS PANELS (TWD)

NON FIRE RATED

ACE have developed fully concealed wall access panel enabling the same material to be adhered to the face of the door giving a gap to simulate the grout line.

Various materials may be used, such as ceramic tiles, granite, slate, limestone or wood. These panels are custom made dependent on the module of the tile.

Our panels are manufactured from electro-galvanised zinc coated mild steel, polyester coat finish, however in high humidity areas stainless steel is recommended.
