## ACCESS PANELS

### BESPOKE CORRIDOR SYSTEMS

## FULLY ACCESSIBLE CORRIDOR SYSTEM

### *NON FIRE RATED*

In modern buildings services are continually being condensed into smaller voids, particularly along corridors, making suspension from the soffit difficult.

Ace have developed a continuous accessible/demountable ceiling system spanning from wall to wall, each panel is independently removable without the use of extraction tools.

Tiles are available in various modules and widths across the corridor to a maximum of 3000mm.

Tiles are available in perforated or plain metal and finished in RAL 9010 20% gloss as standard. Alternative finishes are available to any B.S. or RAL colour range.
